

Q Hi Kathleen,

I do not understand what I am doing wrong with my animation. When I add sound in TVPaint it shows the animation with the sound, but when I export it... the animation disappears and the sound is left. Is there something else I am suppose to do to make them both show up when I export it?

ANSWER:

"when you're exporting the clip from tvp, make sure the export sound track box is checked. its located above the export button. (go to file, click export to, then at the bottom about the export button make sure export sound track is checked)"

Hope this helps...
